VAT is the tax levied by the European Union

Resources

- 1- Auctions
- 2- Local dealer
- 3- OWN STOCKS
- 4- Private sellers

links to the websites of these are provided on the last page

Market price

When buying from auctions, we use a web service called CAP** to predict the current auction price for any vehicle. It tells us the range of prices that a vehicle should make. It is quite accurate, 95% of all the result prices fall within the range that CAP depicts.

For private sellers and dealers, we use AUTOTRADER. This is the biggest portal web site for selling UK cars.

**CAP

<http://www.valuationanywhere.co.uk/Default.aspx>

This website provides most of the important information about any car, simply by doing a search on the number plate. For example; maker, model, **Market price for dealers**(depending on the mileage, the market price of the vehicle changes, CAP accounts for this too),**No. of Previous owners**,first registration date, **Full VIN**, color, Fuel, CO2 Emissions etc

Production Year

If you need to know the production year, please follow the instructions below.
Find out the full chassis number from CAP.
Search the production year using the website below:

<http://partsale.eu/> OR

<https://www.vindecoderz.com/EN/check-lookup/JTEBZ29J500186796> OR

<https://cars-info.eu/>

Note: This will work for most of the vehicles, but for some it will not. If you need to know the production year but the method above doesn't work, then please let us know to check the vehicle physically.

V5 MOT

V5: Registration document/export certificate without the V5, the vehicle cannot be exported.

MOT: Ministry of Transport (Road Worthiness Certificate) UK Local inspection certificate.

Inspection

> **JEVIC/EAA , QISJ & INTERTEK:**

MOT & V5 are always required to apply for ALL inspection certificate.

(JEVIC/ EAA IS Required for UGANDA & ZAMBIA)

(QISJ IS REQUIRED FOR KENYA)

(INTERTEK IS REQUIRED FOR MOZAMBIQUE)

> Currently there is no Inspection centre for TANZANIA.

TYPES OF CABs

1 – Day Cab: A truck cab without a Sleeper Cab (Sleeper Cab : The portion of the truck's interior designated for sleeping, legally must contain a bed) Bitmap

2 – Sleeper Cab: It is a compartment attached to the cab where the driver can rest.

TYPES OF TRUCKS

Rigid Truck:

A truck to transport cargo. Rigid Truck can be Day Cab/Sleeper Cab and Body type can be “Curtain Side”.

1- Chassis Cab / Cab Chassis Trucks:

A truck with only lower chassis.

2- Curtain Side:

Can be either a dry box with trap sides, or a flatbed with a movable frame.

3- Drop Deck:

A flatbed with a lowered deck, featuring a raised step at the front, where the trailer attaches to the fifth wheel.

4- Drop Side:

“Drop Side” same as “Dump Trucks of Japan”

Truck that drops down to open

5- Tipper Trucks:

The rear platform of which can be raised at the front end to enable the load to be discharged by gravity.

Also comes with Hiab Crane. Same as “Dump Trucks of Japan”

TRUCKS

Tractor Unit Prime mover or traction unit is a characteristically heavy-duty towing engine that provides motive power for hauling a towed or trailer load

Rigid truck is motor vehicle with two axle sets, a driver's position, a steering system, motive power and a single rigid chassis. Basically it refers to all big and small trucks.

Thank You
